Our Property and Premises Group provides broad forensic engineering knowledge and experience to determine the primary cause and contributing factors of a loss.

Types of investigations:

Property Loss

- Flood
- Fire
- Explosion
- Toxic leak
- Collapse
- Construction defect

Premises & Occupier Liability

- Slip, trip and fall
- Entanglement and entrapment
- Lighting and visibility
- Warnings and signage
- Code compliance

MEA forensic engineers and scientists work with clients to investigate a wide range of transportation, injury, product, and property and premises cases. Our highly-qualified staff work individually or in multidisciplinary teams to bring the right combination of knowledge, skill and experience to every case.
