📍 Toronto

As a technician in the Toronto office, Cassandra Chase routinely works alongside the testifying engineers and scientists at MEA Forensic. From preparing detailed technical drawings, to setting up tests, and scanning evidence, her work provides the foundation for good analysis and reliable conclusions. Cassandra tackles a wide range of tasks: “I guess my unofficial title could be the office ‘chameleon’,” and has a deep understanding of advanced technologies, like 3D scanners.

Cassandra holds Bachelor and Master of Science degrees in Forensic Science, with a particular focus on 3D LiDAR scanners used to document, measure and reconstruct accident scenes.

At MEA Forensic, she has found a fulfilling environment where she can apply her skills to interesting and challenging projects. “The engaging work and company culture drew me to MEA; they care about their work, clients and colleagues.”

education

Master of Science, Forensic Science, Trent University, 2022.

Bachelor of Science, Forensic Science with a specialty in Physics, University of Ontario Institute of Technology, 2021.
